RELEASED: April 12, 1985
3:00 P.M. ET

For subscribers of "POTATOES & SWEETPOTATOES"

POTATO STOCKS UP 5 PERCENT

April 1, 1985 stocks of potatoes in the 15 major States are estimated at 85.4 million cwt (3.87 million metric tons), up 5 percent from last year, but 5 percent below April 1983. The remaining stocks account for 28 percent of Fall potato production compared with 29 percent on hand this time last year.

FALL POTATOES: PRODUCTION AND STOCKS (FOR 15 STATES ESTIMATING POTATO STOCKS)

* Requests for a subscription order form covering all available reports *
* should be directed to Crop Reporting Board Publications, Room 5829 - *
* South Building, USDA, Washington, D.C. 20250 (Phone (202) 447-4021). *

```
*****
* NOTE: Stocks are defined as the quantity remaining in storage for all*
* purposes and uses, including shrinkage and waste and other *
* losses that occur after the date of each report. Sales of fall*
* potatoes for all purposes generally account for about 90 per- *
* cent of the total fall production. Shrinkage, loss and home *
* use account for the remaining 10 percent. *

1/ TOTAL QUANTITY RECEIVED AND USED FOR PROCESSING REGARDLESS OF THE STATE IN WHICH THE POTATOES WERE PRODUCED. DOES NOT INCLUDE QUANTITIES USED FOR POTATO CHIPS IN MAINE, MICH, MINN, N DAK, OR WIS. 2/ INCLUDES MAINE GROWN POTATOES ONLY. 3/ MICH, MINN, N DAK, AND WIS.

RELIABILITY OF APRIL 1 STOCKS ESTIMATES

The "Root Mean Square Error" for the April 1 stocks estimate is 4.6 percent. This means that the chances are 2 out of 3 that the current estimate of 85.4 million cwt will not be above or below the final estimate by more than 4.6 percent or approximately 3.9 million cwt. Chances are 9 out of 10 (90 percent confidence level) that the difference will not exceed 8.0 percent or approximately 6.8 million cwt.

The 10-year (1975-84) record of the differences between the April 1 stocks estimates and the final estimates averaged 3.71 million cwt, ranging from 0.24 million to 5.26 million cwt. During this 10-year period, the April 1 estimate has been below the final estimate 9 out of 10 years.

In the three Eastern States, stocks totaled 8.99 million cwt, down 11 percent from last year and 24 percent below two years ago. Maine holdings were down 11 percent; New York, down 21 percent; while Pennsylvania storages held 4 percent more than last year.

The six Central States stored 16.4 million cwt on April 1, 1985, a gain of 23 percent from the previous year and 9 percent above two years ago. North Dakota stocks were up 6 percent; Minnesota storages held 27 percent more; Wisconsin cellars stored 44 percent more and Michigan stocks were 24 percent greater than a year ago.

Stocks in the six Western States totaled 60.0 million cwt, up 3 percent from last year, but 5 percent below two years ago. Idaho and Washington stocks were each about 1 percent above 1984 levels; Oregon holdings were down 2 percent. Colorado stocks were up 32 percent, while California storages held 18 percent less than a year ago. Montana potatoes (mostly for seed) started moving, but present stocks are 12 percent above last year.

Disappearance from harvest to April 1, 1985, totaled 217 million cwt, up 7 percent from a year ago and 4 percent above two years ago. March disappearance at 31.2 million cwt, was up 1 percent from 1984. Shrink and loss totaled 25.4 million cwt so far this season compared with 21.0 million cwt a year ago.

Processing in the eight major States stands at 95.3 million cwt this season, up 14 percent from a year earlier. During March, processing plants used 13.3 million cwt of potatoes, fractionally above last March.
